It is with great enthusiasm that KCIFMA introduce to our members our involvement with a new collaboration of professionals in the greater Kansas City area ...The

**Built Environment Partnership**  
 or also known as,  
**BEP**

**Purpose of BEP:**  
 The BEP was organized in order to bring different industries together that are related in the Architectural, Interior Design and Engineering fields for the purposes of sharing education and raising the level of available education to each of our individual organizations through collaboration.

**Collaboration Efforts:**  
 A shared calendar ([www.bepkc.org](http://www.bepkc.org)) has been created to view events happening in the industry. The website also provides a means for our different organizations to coordinate and/or collaborate on events so that we may increase attendance, share expenses and draw better speakers and better venues.

In the future we hope to add, an interactive feature for shared events, online registration, and for the tracking of events and attendance. Currently, our site, in addition to the shared calendar, displays each organization's logo with a link to their organization's individual site, as well as rotating advertisements for the BEP collaborative events.

The BEP is a resource to you, KCIFMA, and is supported by the area's professional organizations.

To see all of the BEP events happening in Kansas City, go to the KCIFMA website ([www.kcifma.com](http://www.kcifma.com)) and click BEP Calendar link located next to the KCIFMA Event Calendar.
